INDEX TO VOLUME 101

Abrupt climate change and transient climates during the Paleogene: a marine perspective [J. C. Zachos, K. C. Lohmann, J. C. G. Walker, and S. W. Wise], 191

Accumulation rates of carbonate platforms [H. Bosscher and W. Schlager], 345

Age of metamorphism in the high-grade rocks of Sri Lanka [A. Kröner and I. S. Williams], 513

Aggarwal, H. *See* Oberbeck, V. R.

Algeo, T. J. *Quantifying stratigraphic completeness: a probabilistic approach using paleomagnetic data*, 421

Allmendinger, R. W. *See* Jordan, T. E.

Analysis of erosion thresholds, channel networks, and landscape morphology using a digital terrain model [W. E. Deitrich, C. J. Wilson, D. R. Montgomery, and J. McKean], 259

Analysis of Seasat-L-band radar imagery of the West Bay–Indin Lake fault system, Northwest Territories [T. M. Kusky, P. D. Lowman, Jr., P. Masuoka, and H. W. Blodget], 623

Anderson, A., R. Newton, and B. Sivertsen. *Preface to the centennial issue*, 133

Anderson, J. L. *See* Bender, E. E.

Anomalous Mesozoic thermal regime, central Appalachian Piedmont: evidence from sphene and zircon fission-track dating [B. P. Kohn, M. E. Wagner, T. M. Lutz, and G. Organist], 779

Applied Mineralogical Thermodynamics, by N. D. Chatterjee. *Review* by W. E. Sharp, 686

$^{50}Ar/^{39}Ar$ amphibole ages from the Kingston Complex, New Brunswick: evidence for Silurian-Devonian tectonothermal activity and implications for the accretion of the Avalon Composite Terrane [R. D. Nance and R. D. Dallmeyer], 375

$^{40}Ar/^{39}Ar$ mineral ages from the southern Cape Breton Highlands and Creignish Hills, Cape Breton Island, Canada: evidence for a polyphase tectonothermal evolution [R. D. Dallmeyer and J. D. Keppie], 467

Archean appinites from the Northern Complex, Michigan [R. T. Wilkin and T. J. Bornhorst], 107

Aronson, J. L. *See* Roden, M.

Badger, R. L. *Fluid interaction and geochemical mobility in metabasalts: an example from the Central Appalachians*, 85

Balakrishnan, S. *See* Rajamani, V.

Bauer, P. W. *Proterozoic tectonic evolution of the Picuris Mountains, northern New Mexico*, 483

Beaumont, C. *See* Haggart, M. J.

Bedard, L. P. *Significance of enclave roundness: an inherent characteristic?*, 121

Bedrock channel incision along Piccaninny Creek, Australia [E. E. Wohl], 749

Bender, E. E., J. Morrison, J. L. Anderson, and J. L. Wooden. *Early Proterozoic ties between two suspect terranes and the Mojave Crustal Block of the southwestern U.S.*, 715

Berggren, W. A. *See* Prothero, D. R.

Berry, W. B. N. *See* Blatt, H.

Bingen, B., D. Demaiffe, J. Hertogen, D. Weis, and J. Michot. *K-rich calc-alkaline augen gneisses of Grenvillian age in SW Norway: mingling of mantle-derived and crustal components*, 763

Bischoff, J. L., J. A. Fitzpatrick, and Robert J. Rosenbauer. *The solubility and stabilization of ikaite ($CaCO_3{\cdot}6H_2O$) from 0° to 25°C: environment and paleoclimatic implications for thinolite tufa*, 21

Blatt, H., W. B. N. Berry, and S. Brand, authors of Principles of Stratigraphic Analysis. *Review* by P. M. Sadler, 129

Blodget, H. W. *See* Kusky, T. M.

Bornhorst, T. J. *See* Wilkin, R. T.

Bosscher, H., and W. Schlager. *Accumulation rates of carbonate platforms*, 345

Bourriau, J., editor of Understanding Catastrophe. *Review* by J. J. Sepkoski, Jr., 821

Brand, S. *See* Blatt, H.

Broster, B. E., and A. F. Park. *Dynamic glacigenic deformation of near-surface metamorphic bedrock: Heath Steele Mines, New Brunswick*, 523

Bryozoan Evolution, by F. K. McKinney and J. B. C. Jackson. *Review* M. Patzkowsky, 127

Bundelkhand granites: an example of collision-related Precambrian magmatism and its relevance to the evolution of the Central Indian Shield [A. Rahman and S. M. Zainuddin], 413

Burner, S. *See* Harrison, T. M.

Campbell, J. K. *See* Tulloch, A. J.

A carbon isotope study of graphites from the Kerala Khondalite Belt, southern India: evidence for CO_2 infiltration in granulites [M. Santosh and H. Wada], 643

Changes in braided river morphology resulting from aggradation and degradation [D. Germanoski and S. A. Schumm], 451

Chatterjee, N. D., author of Applied Mineralogical Thermodynamics. *Review* by W. E. Sharp, 686

Chesner, C. A. *See* Meinel, A.

Chiarenzelli, J. *See* McLelland, J. M.

Chronology of motion in a complete thrust belt: the Precordillera, 30–31° S, Andes Mountains [T. E. Jordan, R. W. Allmendinger, J. F. Damanti, and R. E. Drake], 135

Cin, A. *See* Sengör, A. M. C.

Climate of the supercontinent Pangea [J. T. Parrish], 215

Clinoenstatite-bearing buchites possibly from combustion of hydrocarbon gases in a major thrust zone: Glenroy Valley, New Zealand [A. J. Tulloch and J. K. Campbell], 404

A comparison of fission-track ages of apatite and zircon to the K/Ar ages of illite-smectite (I/S) from Ordovician K-bentonites, southern Appalachian Basin [M. Roden, W. C. Elliot, J. L. Aronson, and D. S. Miller], 633

Condit, K. C. *See* Crichton, J. G.

Continental Rift Formation and Its Prehistory, by A. V. Razvalyaev. *Review* by D. Sahagian, 822

Copeland, P. *See* Harrison, T. M.

Cousineau, P. *See* Debelmas, J.

Crichton, J. G., and K. C. Condie. *Trace elements as source indicators in cratonic sediments: a case study from the Early Proterozoic Libby Creek Group, southeastern Wyoming*, 319

Culshaw, N. G. *See* Haggart, M. J.

Dallmeyer, R. D., and J. D. Keppie. *$^{40}Ar/^{39}Ar$ mineral ages from the southern Cape Breton Highlands and Creignish Hills, Cape Breton Island, Canada: evidence for a polyphase tectonothermal evolution*, 467

Dallmeyer, R. D. *See* Nance, R. D.

Daly, J. S. *See* McLelland, J. M.

Damanti, J. J. *See* Jordon, T. E.
Debelmas, J., and G. Mascle, authors of Les Grandes Structures Géologiques. *Review* by D. W. Roy and P. Cousineau, 129
Demaiffe, D. *See* Bingen, B.
Dietrich, W. E., C. J. Wilson, D. R. Montgomery, and J. McKean. *Analysis of erosion thresholds, channel networks, and landscape morphology using a digital terrain model,* 259
Dinosaur Tracks and Traces, edited by D. G. Gillette and M. G. Lockley. *Review* by R. R. Rogers, 128
Drake, L. *See* Gale, S.
Drake, R. E. *See* Jordan, T. E.
Drummond, C. N., and B. H. Wilkinson. *On the use of cycle thickness diagrams as records of long-term sealevel change during accumulation of carbonate sequences,* 687
Dynamic glacigenic deformation of near-surface metamorphic bedrock: Heath Steele Mines, New Brunswick [B. E. Broster and A. F. Park], 523
Early Proterozoic ties between two suspect terranes and the Mojave Crustal Block of the southwestern U.S. [E. E. Bender, J. Morrison, J. L. Anderson, and J. L. Wooden], 715
Eggler, D. H. *See* Kasting, J. F.
Elliot, W. C. *See* Roden, M.
Eocene-Oligocene Climatic and Biotic Evolution, edited by D. R. Prothero and W. A. Berggren. *Review* by D. S. Jones, 685
Evidence in Cerro Pampa volcanic rocks for slab-melting prior to ridge-trench collision in southern South America [S. Mahlburg Kay, V. A. Ramos, and M. Marquez], 703
Evolution of the continental margin of western India: new evidence from apatite fission-track dating [S. Kalaswad, M. K. Roden, D. S. Miller, and M. Morisawa], 667
Fanning, D. S., and M. C. B. Fanning, authors of Soil Morphology, Genesis, and Classification. *Review* by M. A. Velbel, 127
Fanning, M. C. B. *See* Fanning, D. S.
Fitzpatrick, J. A. *See* Bischoff, J. L.
Fluid interaction and geochemical mobility in metabasalts: an example from the Central Appalachians [R. L. Badger], 85
Forensic Geology (2d ed.), by R. C. Murray and J. C. F. Tedrow. *Review* by W. C. McCrone, 685
Gabbroic and pyroxenite layers in the Tinaquilla, Venezuela, peridotite: succession of melt intrusions in a rising mantle diapir [M. Seyler and P. H. Mattson], 501
Gale, S., and P. Hoare, authors of Quaternary Sediments: Petrographic Methods for the Study of Unlithified Rocks. *Review* by L. Drake, 823
Garnet growth during amphibole anatexis: implications of a garnetiferous restite [M. B. Wolf and P. J. Wyllie], 357
Geomorphology of Rocky Coasts, by T. Sunamura. *Review* by M. E. Johnson, 685
Germanoski, D., and S. A. Schumm. *Changes in braided river morphology resulting from aggradation and degradation,* 451
Gillette, D. G., and M. G. Lockley, editors of Dinosaur Tracks and Traces. *Review* by R. R. Rogers, 128
Glover, C., and S. M. Kidwell. *Influence of organic matrix on the post-mortem destruction of molluscan shells,* 729
Godard, G. *See* Yang, J.
Granite platforms in the Wichita Mountains, Oklahoma: pediment outliers of the southern High Plains in Texas and New Mexico [J. A. Harrell], 397
Griggs, J. D. *See* Wright, T. L.
Grotzinger, J. P., and J. F. Kasting. *New constraints on Precambrian ocean composition,* 235
Haggart, M. J., R. A. Jamieson, P. H. Reynolds, T. E. Krogh, C. Beaumont, and N. G. Culshaw. *Last gasp of the Grenville orogeny: thermochronology of the Grenville front tectonic zone near Killarney, Ontario,* 575
Hall, S. A. *See* Harrison, T. M.
Hanson, G. N. *See* Rajamani, V.
Harrell, J. A. *Granite platforms in the Wichita Mountains, Oklahoma: pediment outliers of the southern High Plains in Texas and New Mexico,* 397
Harrison, T. M., P. Copeland, S. A. Hall, J. Quade, S. Burner, T. P. Ojha, and W. S. F. Kidd. *Isotopic preservation of Himalayan/Tibetan uplift, denudation, and climatic histories of two molasse deposits,* 157
Hawaii Volcano Watch: A Pictorial History, 1779–1981, by T. L. Wright, T. J. Takahashi, and J. D. Griggs. *Review* by W. I. Rose, 822
Hertogen, J. *See* Bingen, B.
Hoare, P. *See* Gale, S.
Hogan, J. P. *Monomineralic glomerocrysts: textural evidence for mineral resorption during crystallization of igneous rocks,* 531
Image analysis of stromatolite fabric using a spatial frequency power spectrum analysis system [Y. Zhang, L. Jin, S. Xiao, and Y. Liang], 591
Impacts, tillites, and the breakup of Gondwanaland [V. R. Oberbeck, J. R. Marshall, and H. Aggarwal], 1
Impacts, tillites, and the breakup of Gondwanaland: A Discussion [G. Young], 675
Impacts, Tillites, and the breakup of Gondwanaland: A Reply [V. R. Oberbeck, J. R. Marshall, and H. Aggarwal], 679
Influence of organic matrix on the post-mortem destruction of molluscan shells [C. Glover and S. M. Kidwell], 729
Isotopic preservation of Himalayan/Tibetan uplift, denudation, and climatic histories of two molasse deposits [T. M. Harrison, P. Copeland, S. A. Hall, J. Quade, S. Burner, T. P. Ojha, and W. S. F. Kidd], 157
Jackson, J. B. C. *See* McKinney, F. K.
Jamieson, R. A. *See* Haggart, M. J.
James, W. C., M. A. Knoll, and K. L. Mickus. *Ship Mountains megabreccia: implications for Miocene extensional tectonics, eastern Mojave Desert, California,* 115
Janecke, S. U., and L. W. Snee. *Timing and episodicity of Middle Eocene volcanism and onset of conglomerate deposition, Utah,* 603
Jin, L. *See* Zhang, Y.
Johnson, M. E. *See* Sunamura, T.
Jones, D. S. *See* Prothero, D. R.

CONTENTS OF VOLUME 101

NUMBER 1

1 Impacts, Tillites, and the Breakup of Gondwanaland
Verne R. Oberbeck, John R. Marshall, and Hans Aggarwal

21 The Solubility and Stabilization of Ikaite ($CaCO_3 \cdot 6H_2O$) from 0° to 25°C: Environment and Paleoclimatic Implications for Thinolite Tufa
James L. Bischoff, John A. Fitzpatrick, and Robert J. Rosenbauer

35 Long-Term Landscape Evolution: Early Miocene and Modern Rivers in Southern New South Wales, Australia
Robert Young and Ian McDougall

51 Space-Time Patterns of Magmatism along the Tethysides: A Preliminary Study
A. M. C. Sengör, A. Cin, D. B. Rowley, and Nie S-Y.

85 Fluid Interaction and Geochemical Mobility in Metabasalts: An Example from the Central Appalachians
Robert L. Badger

97 Sm-Nd and U-Pb Isotopic Evidence of Juvenile Crust in the Adirondack Lowlands and Implications for the Evolution of the Adirondack Mts.
James M. McLelland, J. Stephen Daly, and Jeffrey Chiarenzelli

Geological Notes

107 Archean Appinites from the Northern Complex, Michigan
Richard T. Wilkin and Theodore J. Bornhorst

115 Ship Mountains Megabreccia: Implications for Miocene Extensional Tectonics, Eastern Mojave Desert, California.
W. C. James, Martin A. Knoll, and Kevin L. Mickus

121 Significance of Enclave Roundness: An Inherent Characteristic?
L. Paul Bédard

127 *Reviews and Erratum*

131 *Style Guidelines for Authors*

NUMBER 2
100TH ANNIVERSARY SYMPOSIUM

133 Preface to the Centennial Issue
Alfred Anderson, Robert Newton, and Barbara Sivertsen

135 Chronology of Motion in a Complete Thrust Belt: The Precordillera, 30–31° S, Andes Mountains
T. E. Jordan, R. W. Allmendinger, J. F. Damanti, and R. E. Drake

157 Isotopic Preservation of Himalayan/Tibetan Uplift, Denudation, and Climatic Histories of Two Molasse Deposits
T. M. Harrison, Peter Copeland, Stuart A. Hall, Jay Quade, Scott Burner, T. P. Ojha, and W. S. F. Kidd

177 Sensitivity of Eurasian Climate to Surface Uplift of the Tibetan Plateau
J. E. Kutzbach, W. L. Prell, and W. F. Ruddiman

191 Abrupt Climate Change and Transient Climates during the Paleogene: A Marine Perspective
James C. Zachos, Kyger C. Lohmann, James C. G. Walker, and Sherwood W. Wise

215 Climate of the Supercontinent Pangea
Judith Totman Parrish

235 New Constraints on Precambrian Ocean Composition
John P. Grotzinger and James F. Kasting

245 Mantle Redox Evolution and the Oxidation State of the Archean Atmosphere
James F. Kasting, David H. Eggler, and Stuart P. Raeburn

259 Analysis of Erosion Thresholds, Channel Networks, and Landscape Morphology Using a Digital Terrain Model
William E. Dietrich, Cathy J. Wilson, David R. Montgomery, and James McKean

279 River Response to Baselevel Change: Implications for Sequence Stratigraphy
S. A. Schumm

297 Weathering and Global Denudation
Scott M. McLennan

NUMBER 3

305 The Sedimentary Record of Mantle Plume Uplift Preceding Eruption of the Neoproterozoic Natkusiak Flood Basalt
Robert H. Rainbird

319 Trace Elements as Source Indicators in Cratonic Sediments: A Case Study from the Early Proterozoic Libby Creek Group, Southeastern Wyoming
James G. Crichton and Kent C. Condie

333 OIB-Like Mantle Source for Continental Alkaline Rocks of the Balcones Province, Texas: Trace-Element and Isotopic Evidence
James H. Wittke and Lawrence P. Mack

345 Accumulation Rates of Carbonate Platforms
Hemmo Bosscher and Wolfgang Schlager

357 Garnet Growth during Amphibole Anatexis: Implications of a Garnetiferous Restite
Michael B. Wolf and Peter J. Wyllie

375 $^{40}Ar/^{39}Ar$ Amphibole Ages from the Kingston Complex, New Brunswick: Evidence for Silurian-Devonian Tectonothermal Activity and Implications for the Accretion of the Avalon Composite Terrane
R. Damian Nance and R. David Dallmeyer

Geological Notes

389 Stratigraphic and Petrochemical Data Support Subduction Polarity Reversal of the Cretaceous Caribbean Island Arc
M. C. Lebron and Michael R. Perfit

397 Granite Platforms in the Wichita Mountains, Oklahoma, Pediment Outliers of the Southern High Plains in Texas and New Mexico
James A. Harrell

404 Clinoenstatite-Bearing Buchites Possibly from Combustion of Hydrocarbon Gases in a Major Thrust Zone: Glenroy Valley, New Zealand
A. J. Tulloch and J. K. Campbell

413 Bundelkhand Granites: An Example of Collision-Related Precambrian Magmatism and Its Relevance to the Evolution of the Central Indian Shield
Abdul Rahman and Syed M. Zainuddin

NUMBER 4

421 Quantifying Stratigraphic Completeness: A Probabilistic Approach Using Paleomagnetic Data
Thomas J. Algeo

435 Nd- and Sr-Isotope Evidence for Proterozoic and Paleozoic Crustal Evolution in the Brooks Range, Northern Alaska
Bruce K. Nelson, Steven W. Nelson, and Allison B. Till

451 Changes in Braided River Morphology Resulting from Aggradation and Degradation
Dru Germanoski and S. A. Schumm

467 $^{40}Ar/^{39}Ar$ Mineral Ages from the Southern Cape Breton Highlands and Creignish Hills, Cape Breton Island, Canada: Evidence for a Polyphase Tectonothermal Evolution
R. David Dallmeyer and J. Duncan Keppie

483 Proterozoic Tectonic Evolution of the Picuris Mountains, Northern New Mexico
Paul W. Bauer

501 Gabbroic and Pyroxenite Layers in the Tinaquillo, Venezuela, Peridotite: Succession of Melt Intrusions in a Rising Mantle Diapir
Monique Seyler and Peter H. Mattson

513 Age of Metamorphism in the High-Grade Rocks of Sri Lanka
A. Kröner and I. S. Williams

Geological Notes

523 Dynamic Glacigenic Deformation of Near-Surface Metamorphic Bedrock: Heath Steele Mines, New Brunswick
Bruce E. Broster and Adrian F. Park

531 Monomineralic Glomerocrysts: Textural Evidence for Mineral Resorption during Crystallization of Igneous Rocks
John P. Hogan

NUMBER 5

541 Ultrahigh-Pressure (60 Kbar) Magnesite-Bearing Garnet Peridotites from Northeastern Jiangsu, China
Jianjun Yang, Gaston Godard, Jean-Robert Kienast, Yongzheng Lu, and Jinxiong Sun

555 Late Precambrian Crustal Evolution in NE Sudan: Isotopic and Geochronologic Constraints
Robert J. Stern and Alfred Kröner

575 Last Gasp of the Grenville Orogeny: Thermochronology of the Grenville Front Tectonic Zone near Killarney, Ontario
M. J. Haggart, R. A. Jamieson, P. H. Reynolds, T. E. Krogh, C. Beaumont, and N. G. Culshaw

591 Image of Stromatolite Fabric Using a Spatial Frequency Power Spectrum Analysis System
Zhang Yun, Jin Lifang, Xiao Shuhai, and Liang Yuzuo

603 Timing and Episodicity of Middle Eocene Volcanism and Onset of Conglomerate Deposition, Utah
Susanne U. Janecke and Lawrence W. Snee

623 Analysis of Seasat L-Band Radar Imagery of the West Bay–Indan Lake Fault System, Northwest Territories
Timothy M. Kusky, Paul D. Lowman, Jr., Penny Masuoka, and H. W. Blodget

633 A Comparison of Fission-Track Ages of Apatite and Zircon to the K/Ar Ages of Illite-Smectite (I/S) from Ordovician K-Bentonites, Southern Appalachian Basin
Mary K. Roden, W. Crawford Elliott, James L. Aronson, and Donald S. Miller

Geological Notes

643 A Carbon Isotope Study of Graphites from the Kerala Khondalite Belt, Southern India: Evidence for CO_2 Infiltration in Granulites
M. Santosh and H. Wada

652 Timing of Intrusion and Deformation of the Rivière-Pentecôte Anorthosite (Grenville Provence)
Jacques Martignole, Nuno Machado, and Suzie Nante

659 Permian Carbonate Platform Development in an Island-Arc Setting, Eastern Klamath Terrane, California
Rodney Watkins

667 Evolution of the Continental Margin of Western India: New Evidence from Apatite Fission-Track Dating
Sanjeev Kalaswad, Mary K. Roden, Donald S. Miller, and Mari Morisawa

Discussion and Reply

675 Impacts, Tillites, and the Breakup of Gondwanaland: A Discussion
Grant M. Young

679 Impacts, Tillites, and the Breakup of Gondwanaland: A Reply
Verne R. Oberbeck, John R. Marshall, and Hans Aggarwal

685 *Reviews*

NUMBER 6

687 On the Use of Cycle Thickness Diagrams as Records of Long-Term Sealevel Change during Accumulation of Carbonate Sequences
Carl N. Drummond and Bruce H. Wilkinson

703 Evidence in Cerro Pampa Volcanic Rocks for Slab-Melting prior to Ridge-Trench Collision in Southern South America
S. Mahlburg Kay, V. A. Ramos, and M. Marquez

715 Early Proterozoic Ties between Two Suspect Terranes and the Mojave Crustal Block of the Southwestern U.S.
E. Eric Bender, Jean Morrison, J. Lawford Anderson, and Joseph L. Wooden

729 Influence of Organic Matrix on the Post-Mortem Destruction of Molluscan Shells
Clare Glover and Susan M. Kidwell

749 Bedrock Channel Incision along Piccaninny Creek, Australia
Ellen E. Wohl

763 K-Rich Calc-alkaline Augen Gneisses of Grenvillian Age in SW Norway: Mingling of Mantle-Derived and Crustal Components
Bernard Bingen, Daniel Demaiffe, Jan Hertogen, Dominique Weis, and Jean Michot

779 Anomalous Mesozoic Thermal Regime, Central Appalachian Piedmont: Evidence from Sphene and Zircon Fission-Track Dating
B. P. Kohn, M. E. Wagner, T. M. Lutz, and G. Organist

795 Late Paleozoic Remagnetization and Its Carrier in the Trenton and Black River Carbonates from the Michigan Basin
D. Suk, R. Van der Voo, D. R. Peacor, and K. C. Lohmann

809 Komatiite Genesis: Insights Provided by Fe-Mg Exchange Equilibria
V. Rajamani, S. Balakrishnan, and G. N. Hanson
